4 FIRST AID MEASURES

Inhalation:	Move to fresh air. If discomfort occurs, get medical attention.
Skin Contact:	Rinse with plenty of water. If skin irritation persists, call a physician.
Eye Contact:	In case of contact, flush eyes with copious amounts of water for at least 15 minutes while holding eyelids apart. If irritation occurs or persists, get medical attention.
Ingestion:	Never give anything by mouth to an unconscious person. Wash out mouth with water. Do not induce vomiting unless directed by medical personnel. Seek medical attention immediately.

5 FIRE FIGHTING MEASURES

Flammability:	No data
Burning Rate:	No data
Autoignition Temp:	No data
LEL:	No data
UEL:	No data

Advice for fire-fighters:

During all fire fighting activities, wear appropriate protective equipment, including self-contained breathing apparatus.

Hazardous Combustion Products: Formation of toxic gases is possible during heating or fire.

6 ACCIDENTAL RELEASE MEASURES

Personnel involved in clean-up should wear appropriate personal protective equipment (See Section 8). Minimize exposure.

Environmental Precautions:

Place waste in an appropriately labeled, sealed container for disposal. Care should be taken to avoid environmental release.

Methods and Material for Containment and Cleaning Up:

Measures for Cleaning/Collecting: Contain the source of spill if it is safe to do so. Collect spill with absorbent material. Clean spill area thoroughly.

Additional Consideration for Large Spills: Non-essential personnel should be evacuated from affected area. Report emergency situation immediately. Clean up operations should only be undertaken by trained personnel.

7 HANDLING AND STORAGE

Handling Precautions:

Precautions for Safe Handling:

Avoid breathing vapor or mist. Avoid contact with eyes, skin and clothing. When handling, use appropriate personal protective equipment (See Section 8). Wash thoroughly after handling. Releases to the environment, should be avoided. Review and implement appropriate technical and procedural waste water and waste disposal measures to prevent occupational exposure or environmental releases. Potential points of process emissions of this material to the atmosphere should be controlled with dust collectors, HEPA filtration systems or other equivalent controls.

8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: Engineering controls should be used as the primary means to control exposures. General room ventilation is adequate unless the process generates dust, mist or fumes. Keep airborne contamination levels below the exposure limits listed in this section.

Personal Protective Equipment: HMIS PP, B | Safety Glasses, Gloves
Refer to applicable national standards and regulations in the selection and use of personal protective equipment (PPE).

Hands: Wear impervious gloves (e.g. Nitrile, etc.) if skin contact is possible. (Protective gloves must meet the standards in accordance with EN374, ASTM F1001 or international equivalent).

Eyes: Wear safety glasses as minimum protection. Safety glasses must meet the standards in accordance with EN166, ANSI Z87.1 or international equivalent).

Skin: Impervious protective clothing is recommended if skin contact with drug product is possible and for bulk processing operations. (Protective clothing must meet the standards in accordance with EN13982, ANSI 103 or international equivalent).

Respiratory Protection: Under normal conditions of use, if the applicable Occupational Exposure Limit (OEL) is exceeded, wear an appropriate respirator with a protection factor sufficient to control exposures to below the OEL (e.g. particulate respirator with a half mask, P3 filter). (Respirators must meet the standards in accordance with EN140, EN143, ASTM F2704-10 or international equivalent).
